### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### **Response to Amendment**

Upon review of applicant's request for reconsideration, the 103 rejection of claims 1-43 is withdrawn.

### ***Claim Objections***

Claim 16 is objected to because of the following informalities:

- Step (d) refers to itself instead of step (c).

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 9-13, 16-18, 21-24, 27-32, 35-37, 39-42 and 44-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No. 6,123,330 to Schaal.

In regard to claims 1, 9, 16, 21, 27-28, 29, 35-36, 37, 39-40, 44, 46 Schaal discloses a method for controlling a sheet feeding device. The disclosure teaches a method for monitoring resource units (sheets) which includes

- providing a group of sheets (See Fig. 1)

Art Unit: 3653

- determining a thickness of one or more resource units (Col. 1, lines 60+; Col. 2, lines 27+).
- determining when the group of sheets reaches a predetermined size after one or more of the resource units has been moved from the group and responsive to the determination of thickness in step (b) (Col. 2, lines 33+; Col. 2, lines 44+).

Schaal fails to disclose an indicator for indicating when the stack is at a predetermined height (i.e. when the separating blade is approaching position sensor), however indicators for stack height are well known in the art (See for example US Patent No 5,971,392 to Lee Col. 7, lines 16+). Therefore, it would be obvious to one of ordinary skill in the art to add this feature to Schaal's device.

In regard to claim 2, 10, 22, 30 and 45, Schaal's device is a mail conveyor.

In regard to claims 3, 11, 23, 31, 5, 13 and 17, Schaal appears to detect the size of the stack before any sheets are removed from the stack. Since the position sensors are constantly checking the position of the separating blade (Col. 2, lines 44+), Schaal would detect the size of the stack before and during the removal of the sheets.

In regard to claim 4, 12, 24, 32 Schaal discloses a sensor which detects when the size of the stack is less than a second predetermined size (See S2 in Fig. 1)

In regard to claim 6, 18 Schaal feeds the sheets from the bottom of the stack (See Fig. 1).

In regard to claim 41 and 42, Schaal discloses a main controller (HR).

Art Unit: 3653

*Allowable Subject Matter*

Claims 7-8, 14-15 and 19, 20, 25-26, 33-34, 38, 43 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
